

Where Did My Money Go?

Where Did My Money Go?

Wallet Edition

| The expense tracker that keeps you financially accountable.

Target Audience:

- Students
- Fresh graduates
- First-job professionals
- Freelancers

Basically Gen Z.

Core Problem

People don't enjoy budgeting.

Traditional apps are boring.

People quit after 3 days.

RoastWallet makes expense tracking entertaining while still providing meaningful insights.

MVP Features

Authentication

- Register
- Login
- Logout
- Forgot Password (optional)

User Profile

Store

- Name
- Profile Picture
- Monthly Savings Goal
 - Goal Type (Percentage / Fixed Amount)
 - Goal Target
- Currency

Income Sources

Users can manage income records their different income sources.

- Add Income
- Edit Income
- Delete Income
- View Income

Fields

Title

Amount

Income Category

Date

Description (optional)

Default Income Categories

Salary

Freelance

Allowance
Scholarship
Business
Gift
Investment
Other

Why Category instead of Source?

Expense and Income now follow the exact same architecture.

Expense
↓
Category

Income
↓
Category

This keeps the database, models, controllers, forms and relationships consistent.

Expenses

Users can

- Add Expense
- Edit Expense
- Delete Expense
- View Expense

Fields

Title

Amount

Expense Category

Date

Description

Receipt Image (optional)

Expense Categories

Default categories

Food

Coffee

Shopping

Transport

Gaming

Entertainment

Health

Education

Subscriptions

Other

Admin can manage categories.

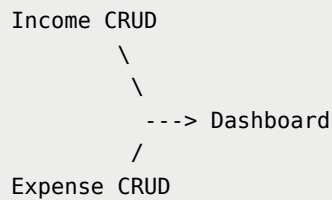

Dashboard

The Dashboard is the **heart of the application**.

It is **not** a static page.

Every Income or Expense created, updated or deleted is automatically reflected in the Dashboard.

Dashboard shows

- Total Income
- Total Expenses
- Remaining Balance
- Current Savings
- Savings Goal Progress
- Savings Rate
- Top Expense Category
- Latest Income
- Latest Expenses
- Monthly Comparison

Every metric is calculated dynamically from the Income Sources and Expenses tables.

Example

+ Add Income
↓

Dashboard

Income
50,000

Expenses
18,000

Balance
32,000

Roast

😊 You're doing okay.

Then

+ Add Expense

40,000

↓

Dashboard

Income
50,000

Expenses
58,000

Balance
-8,000

Roast

🤖 Bro...
You're spending money that doesn't exist.

The user never manually updates the dashboard.

The dashboard always reflects the latest database state.

😂 Roast Engine (MVP)

For now, **don't use AI**.

Use rule-based messages.

Examples

If Food > 40%

You're basically paying Foodpanda's rent.

If Shopping > 35%

Daraz thanks you for your continued support.

If Coffee > 20%

Coffee isn't a personality trait.

If Savings Goal Progress = 0%

Saving money is also a hobby.

Try it.

New Roast Rules Examples

If Expenses > Income

Your wallet has officially entered survival mode.

If Income increased this month

Nice! More income.

Let's not donate it all to Foodpanda.

If Savings Rate > 30%

Look at you...

being financially responsible.

Who are you?

Achievements

Examples

Logged expenses 7 days straight

Logged first income

Stayed under budget

No shopping this week

No food delivery for 5 days

Features across Modules

Search

Search belongs to the pages where users manage records.

Search

- Expense Title
 - Expense Category
 - Income Title
 - Income Category
-

Pagination

It exists anywhere a list becomes long.

- 10 expenses per page
- 10 income records per page

Pagination is not even really a "module."

It's a UI/data retrieval feature.

REST API

Expose

```
GET /expenses
POST /expenses
PUT /expenses/{id}
DELETE /expenses/{id}

GET /income
POST /income
PUT /income/{id}
DELETE /income/{id}

GET /categories/expenses

GET /categories/income

GET /reports
```

Protect everything with Sanctum.

Roles

User

Can manage

- Own Income Sources
 - Own Expenses
-

Admin

Manage

- User Management
 - Expense Categories CRUD
 - Income Categories CRUD
 - Achievement CRUD
 - Analytics
-

Database Design

```
users
profiles
income
income_categories
expenses
expense_categories
achievements
user_achievements
```

That's enough for MVP.

Business Rules

Rule 1

Income must belong to the logged-in user.

Rule 2

Expense must belong to the logged-in user.

Rule 3

Income Amount > 0

Rule 4

Expense Amount > 0

Rule 5

Income Category is required.

Rule 6

Expense Category is required.

Rule 7

A user may have only one active Savings Goal in the MVP.

Rule 8

Receipt image is optional.

Rule 9

Users cannot edit other users' income or expenses.

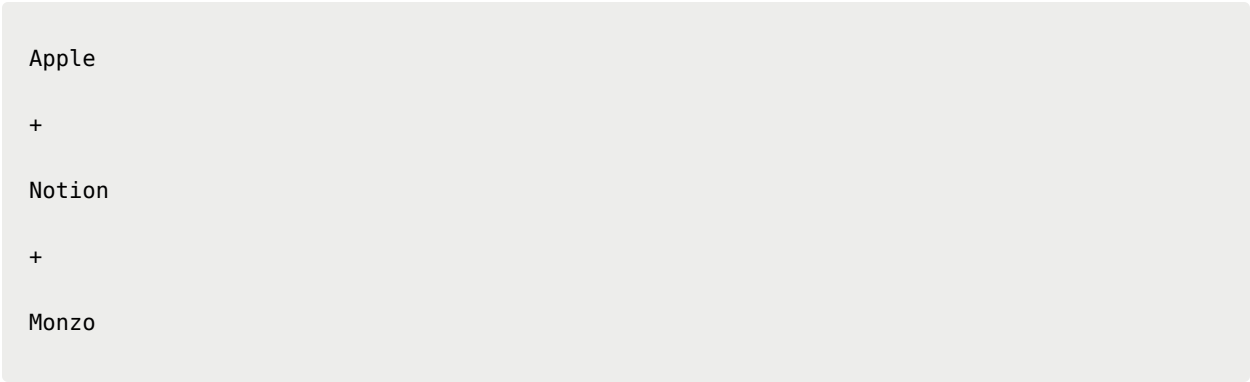

Rule 10

Admin can manage Expense Categories and Income Categories.

UI

Very minimal.

Think

Apple

+

Notion

+

Monzo

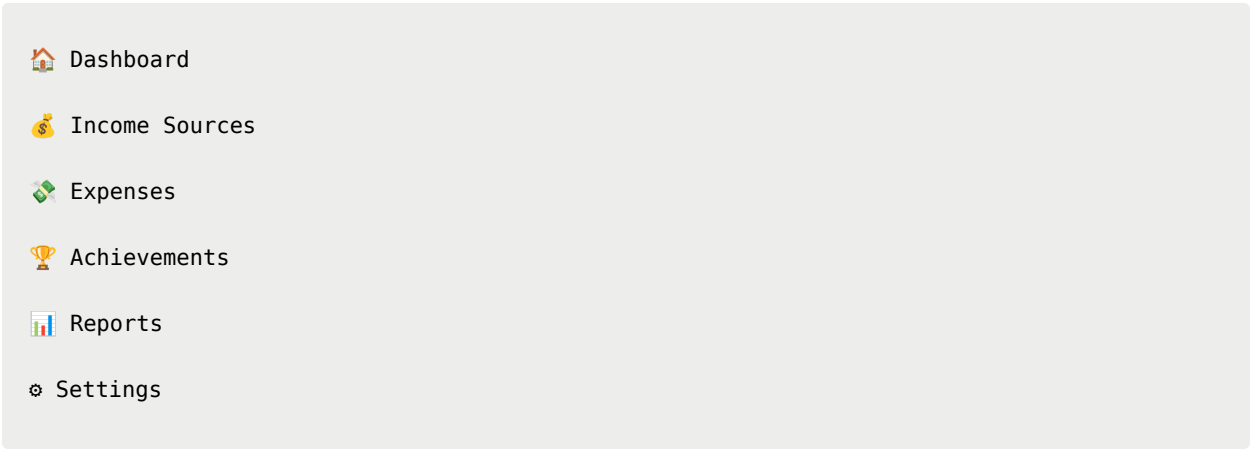

No gradients.

Rounded cards.

Large typography.

Lots of whitespace.
